PROFILE

As a graduating BSIT student with a passion for web development, I have acquired a strong foundation in web development frameworks, and databases. Throughout my academic journey, I have gained experience in designing, developing, and maintaining web applications using various front-end and back-end technologies. As a web developer, I am excited to bring my skills and experience to contribute to your organization.

- Ensure information is accurate per customers request

Full Stack Developer Intern

Devkinetics | October 2022

In my experience, I have utilized AWS Amplify, Cognito, and DynamoDB to manage user authentication, data, and uploads for 5000+ users. I also configured S3 SDK and policies for the upload of personal information to AWS S3. Additionally, I have handled routing, third-party APIs, and emphasized optimization and documentation upkeep.
